“The Trondheim Early Secure Study”

—A Prospective Community Study of  
Psychosocial Development and Mental Health from Preschool to Adolescence

Lunedì 13 Marzo 2023 Ore 16.00-18.00

Aula Magna, Dipartimento Psicologia Dinamica, Clinica e Salute  
Via degli Apuli,1

The longitudinal Trondheim Early Secure Study (TESS) has been going on for 15 years. Since 2008, when the children were 4 years of age, the TESS has biennially collected extensive data (psychiatric interviews, tests, observations, and questionnaires,) from the children themselves as well as their parents and teachers. Dr. Viddal will focus on selected key mental health findings from the TESS, and methodological issues when studying developmental processes.
